## SUMMARY

I am a Multi Talented Front End Developer with experience in Web Software Industry. I have demonstrated excellent skills in HTML, JavaScript, React and I am a true team player with strengths in adaptability and accuracy. An innovative and technically-astute website designer well-versed in analyzing user needs and developing software to meet diverse needs is who I am. Demonstrating mastery of multiple programming languages and proactively keeping up with industry trends, I am driven to wear many programming hats with expertise in creating everything from new static pages to new functional websites/apps. I pay attention to detail, possess an excellent organizational skills with clear understanding of Task and training in Skill. I am always ready to learn, and grow.

## EDUCATION

2019-2025

FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE

Bachelor of Engineering (B.Eng) in Material and Metallurgical Engineering

## PROFESSIONAL EXPERIENCE

Freelance / Project-Based

July 2023 – Present

- Front-end development: Using HTML, CSS, JavaScript, and frameworks like React, Next.js, Word-press, and Web-flow, I created user-friendly, responsive websites. used these abilities to create unique Word-press themes and Web-flow websites for customers, incorporating sophisticated React component-based architecture for increased usability and scalability.
- Back-end Development & Database Management: Developed robust back-end solutions using Node.js and Express with MongoDB for data management, including custom API endpoints, user authentication systems, and data tracking mechanisms.
- Dynamic UI Components: Implemented various custom animations and UI features in React

Freelance |Front End Developer | betting platform project

August 2024 - November 2024

- Real-Time Sports Data Integration: Collaborated with a team of developers to build a responsive, interactive betting platform with real-time sports scores and data updates.
- UI/UX Design & Development: Designed and developed modular, responsive interfaces using React for a seamless user experience across devices.
- State Management: Implemented efficient state management using React Context API to handle real-time data streams and provide consistent, accurate updates across the platform.
- Performance Optimization: Focused on optimizing the platform's front-end performance, reducing load times and enhancing responsiveness through code-splitting, lazy loading, and JavaScript optimizations.
